TALUPULA YASWANTH

LinkedIn: talupula-yaswanth
GitHub: TalupulaYaswanth
E-Mail: Talupulayaswanth13@gmail.com
Mobile: +91 8179090074

SKILLS

Programming Languages:	C, C++, Java, Python, SQL
Databases & Storage:	MySQL, MongoDB, Relational Database Management Systems (RDBMS)
AI, ML & Deep Learning:	Natural Language Processing (NLP), Computer Vision (CV), PyTorch, Scikit-learn
Web Development:	HTML5, CSS3, JavaScript, React.js, FastAPI, Flask
Developer Tools:	Git, GitHub, Git Bash, VS Code, Docker, Linux/Bash, Jupyter Notebook
Core CS Concepts:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), OS
Professional Skills:	Time Management, Team Collaboration, Analytical Problem Solving, Adaptability

FEATURED PROJECTS

Movie Recommendation System [*GitHub*] Active

- Developed a hybrid recommender engine, merging content-based filtering and collaborative methods to predict items with a 28% better precision.
- Processed 10,000+ film metadata entries through the creation of efficient data pipelines using vector operations in Pandas and NumPy, thereby optimising ingestion rate by 35
- Built an interactive web application where users can search for films and receive results within 200ms with minimal query processing time.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Streamlit.

CodeExplain (AI Code Explanation Tool) [*GitHub*] Active

- Engineered an automated code analysis engine integrating Large Language Models and Natural Language Processing pipelines to translate complex source scripts into structured, human-readable documentation with 92% accuracy.
- Streamlined developer code comprehension workflows, achieving a 40% reduction in manual code review overhead and debugging time across multi-language repositories.
- Deployed a responsive web interface capable of parsing real-time user inputs and rendering granular block-by-block structural explanations instantly.
- **Tech Stack:** Python, Flask, NLP, LLM APIs, JavaScript, HTML5, CSS3.

AI Chatbot for Customer Care [*GitHub*] *(In Progress)*

- Architecting an autonomous conversational support agent driven by advanced intent classification models, designed to automate 70% of routine customer query resolution workflows.
- Implementing robust state-tracking dialogue management mechanisms to significantly decrease average support ticket handling time by 45
- **Tech Stack:** Python, Natural Language Processing, Machine Learning, Flask.

ACHIEVEMENTS & HONORS

- **LeetCode 50 Days Badge (2026):** Maintained continuous problem-solving consistency across advanced Data Structures and Algorithms.
- Solved **200+** algorithmic problems across LeetCode, GeeksforGeeks, and CodeChef focusing on Dynamic Programming, Trees, and Graphs.
- Selected among top university performers in competitive programming and core computer science hackathons.

CERTIFICATIONS

- **Deep Learning Specialization** – DeepLearning.AI / Coursera
- **Natural Language Processing (NLP) Specialization** – DeepLearning.AI / Coursera
- **Computer Vision with Deep Learning** – Online Professional Platform
- **Database Management Systems (DBMS) & SQL Masterclass** – Online Professional Platform

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.65 / 10.0 Aug' 2024 – Present

Narayana Junior College (BIEAP) Poranki, Andhra Pradesh
Intermediate (12th Grade) – Mathematics, Physics, Chemistry — Percentage: 85.3% (Grade A) Mar' 2024

Vijaya Nikethan E.M. High School (BSEAP) Panyam, Kurnool, Andhra Pradesh
Secondary School Certificate (10th Grade) – First Division — Percentage: 63.17% Apr' 2022
